

KRISHAN KANT

React Native Developer | Cross-Platform Mobile App Development

Ghaziabad, Uttar Pradesh, India | +91 8810419209 | krishankantrajput2112@gmail.com | [linkedin.com/in/krishan-kant-615740305](https://www.linkedin.com/in/krishan-kant-615740305)

PROFESSIONAL SUMMARY

React Native Developer with hands-on experience building and deploying cross-platform mobile applications for Android and iOS using React Native, Expo, and Firebase. Proficient in mobile UI development, feature-extraction logic, on-device machine learning integration (TensorFlow.js), and REST API consumption. Solid full-stack foundation in JavaScript, Node.js, Express.js, and databases (MySQL, MongoDB, Firebase) supporting end-to-end mobile app development. Focused on app performance, responsive UI/UX, smooth navigation, and secure data handling.

CORE SKILLS

- Mobile Development: React Native, Expo, Cross-Platform (Android & iOS), Mobile UI/UX, Responsive Layouts, Navigation & Routing
- Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Component-Based Architecture
- Backend: Node.js, Express.js, REST API Design & Integration
- Databases & Cloud: Firebase (Firestore, Authentication), MySQL, MongoDB, XAMPP
- Machine Learning: TensorFlow.js Model Integration, On-Device Inference, Feature Extraction
- Tools & Platforms: Git, GitHub, Postman, Expo Build Tools, Netlify, VS Code
- Practices: CRUD Operations, Data Validation & Error Handling, Cross-Browser/Device Compatibility, Agile/Iterative Development, App Deployment & Testing

PROJECTS

Phishing Detector Mobile App

September 2026

React Native, Expo, Firebase, TensorFlow.js

- Built a cross-platform React Native mobile app for Android and iOS that detects phishing URLs in real time.
- Designed mobile-first UI screens and navigation flows in React Native for a smooth, responsive user experience.
- Engineered feature-extraction logic (URL length, HTTPS presence, suspicious symbols) to prepare inputs for on-device classification.
- Integrated a TensorFlow.js machine learning model directly into the mobile app to classify URLs as safe or phishing.
- Implemented Firebase Firestore for cloud data storage, persisting detection history and powering in-app analytics.
- Configured and shipped test builds via Expo, handling the Android/iOS build and deployment workflow.

Phishing Website Detector (Admin Dashboard)

July 2026

HTML5, CSS3, JavaScript, Node.js, Express.js, JSON Database

- Built a responsive admin dashboard using Express.js and JavaScript for tracking students, courses, attendance, and fees.
- Designed and tested REST APIs supporting full CRUD operations for core data entities.
- Implemented input validation and error handling to ensure secure and reliable data management.

Portfolio Website

January 2026

React, Tailwind CSS, Node.js, Firebase, Netlify

- Designed and built a personal portfolio website in React and Tailwind CSS to showcase projects and technical skills.
- Ensured cross-browser compatibility across Chrome, Firefox, and Edge through systematic testing.
- Deployed the site on Netlify using reusable, modular component architecture for easy maintenance.

EDUCATION

Master of Computer Applications (MCA) — Pursuing

2025 – 2027

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

Bachelor of Computer Applications (BCA)

2022 – 2025

Chaudhary Charan Singh University (CCSU)

12th Standard (CBSE)

2022

10th Standard (CBSE)

2020
